## Work Experience

---

### **Full Stack flex Developer**

University of Connecticut Bootcamp - Stamford, CT

March 2022 to Present

I am a bootcamp student. I am passionate about technology and programming. I build my projects with intense care, passion and love for the creativity/problem solving skills that coding brings to the table. Learning is my hobby; therefore, programming doesn't seem like a chore or "just a job" to me. Rather, programming gives me a chance to enjoy the activities I love!

Skills I practiced:

- Building front-end websites from scratch.
- Using ready-made frameworks that enable you to build efficiently.
- Creating full-stack single-page web applications using RESTful API routes and AJAX methods.
- Implementing structured and unstructured databases to convert static websites into dynamic websites that persist data.
- Utilizing the standard basics of social coding including, source control and issue tracking.
- Teamwork and project management skills as a collaborator and independent programmer.

Agile development

HTML -- CSS -- Git

JQuery -- Bootstrap

Object- oriented programming

JavaScript - ES6 -- Node

APIs -- AJAX -- JSON

Express - Sequelize

MySQL -- PostgreSQL

MVC paradigm -- MERN Stack

React -- Progressive Web Apps

Computer science fundamentals
